1. Innovative Strategies and Frameworks in Climate Change Adaptation : Emerging Research and Opportunities

電子書籍

By: Flor, Alexander G.; Flor, Benamina Gonzalez; IGI Global. Hershey, Pennsylvania [701 E. Chocolate Avenue, Hershey, Pennsylvania, 17033, USA] : Engineering Science Reference. 2018. eBook. Description: The **changes** the earth is currently undertaking has been at the forefront of scientific discourse in recent years. Humans as a species have needed to react to these **changes** and shift their behavior accordingly. Innovative Strategies and Frameworks in **Climate Change** Adaptation: Emerging Research and Opportunities is a critical scholarly resource that examines the relationship between humans and the changing earth as well as the ways in which humans react to these shifts. Featuring coverage on a wide ... (AN 1625441)

2. Combatting Climate Change in the Pacific : The Role of Regional Organizations

By: Williams, Marc; McDuie-Ra, Duncan. Series: Palgrave Pivot. Cham, Switzerland : Palgrave Macmillan. 2018. eBook. Description: This book analyses the regional complexes of **climate** security in the Pacific. Pacific Island States and Territories (PICTs) have long been cast as the frontline of **climate change** and placed within the grand architecture of global **climate** governance. The region provides compelling new insights into the ways **climate change** is constructed, governed, and shaped by (and in turn shapes), regional and global **climate** politics. By focusing on **climate** security as it is constructed in the Pacific and how this ... (AN 1658704)

Retreat or Rebuild: Exploring Geographic Retreat in Humanitarian Practices in Coastal Communities

Rosetta S. Elkin and Jesse M. Keenan

Abstract This chapter identifies an emerging discourse among humanitarian actors with regard to the planning and design of post-disaster geographic retreat of coastal communities. This chapter attempts to synthesize transdisciplinary knowledge in geography, landscape ecology and climate adaptation in order to offer insight into the unrecognized factors shaping the planning and design of the environments and landscapes of coastal retreat. This chapter evaluates the proposition that managing the cultural, environmental and economic byproducts of the former inhabited coastal geography are central to transformative adaptation. Particularly in light of sea level rise, autonomous landscape processes are central to these transformations. Beyond mere relocation, this chapter seeks to expand the definition of coastal retreat by examining the consequences and implications of existing frames defined by disaster resilience and housing, land and property issues. This chapter highlights two external case studies from Japan and the Philippines that provide qualitative evidence in an affirmation of the underlying theoretical proposition
